## **ADDENDUM NO. 4 TO RFP 9600-75: Population Health Software**

**Date:** 11/22/17

**To:** All participants submitting Proposals for RFP # 9600-75

**From:** Kristen Aldrich, Deputy Purchasing Agent, NMC Contracts Division

**Subject:** Addendum No. 4 to RFP #9600-75

---

**This addendum is to announce additional clarification regarding Prime metric build as referenced in RFP # 9600-75 for Healthcare Population Software. The County feels this information wasn't made clear in the RFP originally. Based on concerns raised by potential bidders, the County would like to release this added clarification to all interested bidders.**

PRIME metric build clarification:

The majority of the PRIME metrics are currently being reported using NMC's SSRS dashboard. The initial workflow assessment and survey information has been completed, and discrete quality data fields defined for approximately 90% of the metrics. Regarding the CG-CAHPS, H-CAHPS, and perinatal metric reports not built in SSRS, the data is being aggregated both internally and externally, and submitted separately. As for the new population health software integration, the metric build for the existing reports would capture data from discrete fields utilized in clinical documentation and the SSRS dashboard. It would be expected that the population health software vendor would partner with Monterey County to devise the most efficient method to incorporate the external reporting sources.

- ❖ This acknowledgement signature page of Addendum No. 4 must be submitted with your proposal.
- ❖ If this acknowledgement signature page is not submitted with you bid proposal, your entire proposal package may be considered non-responsive.
